Dear John Danner

Thank you for your business. We are excited to provide your insurance for the property identified below.

Property Address:

30 Winter Pl
San Francisco, CA 94133-2722

As part of our underwriting process for your upcoming renewal, Farmers requires proof of a qualifying installed whole house water leak detection device with automatic shut-off. Please provide documentation from a water leak detection device vendor with proof of professional installation by a licensed contractor to your agent. The documentation must include the following components:

- The vendor's logo; and
- The device type by vendor name, including confirmation that the device includes automatic water shut-off capability; and
- A property address matching the insured property address; and
- The date of device installation

If you have already provided the requested information, please disregard this notice.

If we do not receive the requested information by 11/30/2024, the policy for the above referenced dwelling will be set to non-renew on 3/9/2025. Please note that as part of the underwriting review process, your policy is also subject to all other standard underwriting criteria. Obtaining the professionally installed whole house water leak detection device with automatic shut-off does not guarantee a renewal offer.

Thank you for allowing us the opportunity to serve you. If you have any questions, please contact your Farmers agent, Kevin Boyce at (916) 783-9044, or call Farmers directly at (877) 327-6592.

Sincerely,

Farmers Insurance Group®
